EXAMINER'S ACTION

Art Unit: 2872

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-9, 13 and 14, drawn to an optical polarizer comprising a polymeric reflective polarizer including first and second polymeric materials, wherein at least one of the first and second polymeric materials being birefringent, and an absorbing polarizer with particular absorbing polarizer details, classified in class 359, subclass 487.
 - II. Claims 10-12 and 15-42, drawn to an optical polarizer comprising a polymeric reflective polarizer including first and second polymeric materials, wherein at least one of the first and second polymeric materials being birefringent, and an absorbing polarizer with particular reflective polarizer details, classified in class 359, subclass 487.
 - III. Claim 43, drawn to a display device comprising a light modulator, a reflective polarizer and a dichroic polarizer, classified in class 359, subclass 246.
2. Claim 1 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or

divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions III and I, II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because of the omission of at least one of the first and second polymeric materials being birefringent. The subcombination has separate utility such as an optical device without a light modulator.

4. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as an optical device without having a dichroic dye. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or the search required for Group I would further require a search in class 359, subclass 491 which is not required for Group

Art Unit: 2872

II and the search required for Group II would further require a search in class 359, subclass 500 which is not required for Group I, restriction for examination purposes as indicated is proper.

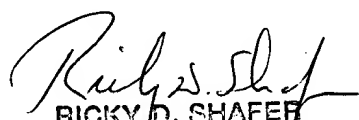

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to R.D. Shafer whose telephone number is (703) 308-4813.
